

Your Trusted Partner in Cathodic Protection and Corrosion Solutions.

Cathodic Protection International Companies (CPI Co.) is a distinguished leader with over 18 years of expertise in corrosion engineering and cathodic protection solutions across Latin America. We specialize in providing comprehensive, environmentally harmonious protection for critical infrastructure, including gas and oil pipelines, industrial plants, marine platforms, and more.

The highly qualified professional and technical personnel of CPI Co. certified by NACE International guarantees to our clients the optimal conditions for the correct development of the Projects in which investments are required to the assets and in concordance to the policies of safety and the environment.

Commercial Partners

FARWEST CORROSION
CONTROL COMPANY

Our Services

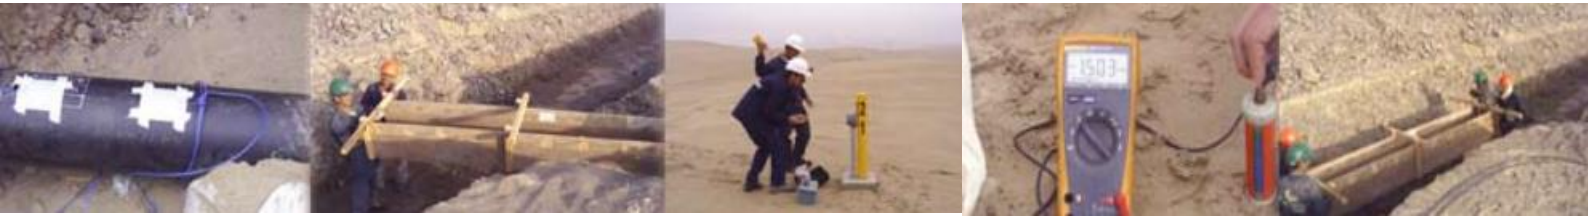

Corrosion Engineering

- Corrosion study.
- Design and engineering of cathodic and anodic protection systems.
- Current Injection Testing.
- Courses and training in Corrosion and Cathodic Protection.
- Studies and analysis of interferences by telluric AC and DC.
- Interference mitigation.
- Maintenance of SPC Quarterly, Every 6 Months, Yearly.

Integrity Services

- External Corrosion Rating Inspections ECDA.
- Internal Corrosion Rating Inspections ICDA.
- Inspections of Cathodic Protection Systems: CIS, PAP (ON-OFF).
- Coatings Inspections: Holiday Detector, DCVG, PCM.
- Center Line in ducts.
- Risk-Based Studies, RBI.
- Soil studies: Point resistivity, Continuous resistivity, pH, REDOX Potential, Sulphates, Carbonates.
- Sub metric GPS Survey.
- Inspection of insulating joints.
- Duct Integrity Software.

Assembly and Installations

CPI Co. realizes Assemblies and Installations of Cathodic Protection Systems under rigorous parameters of Quality Control, Norms of Safety, Occupational Health and Preservation of the Environment.

- Cathodic Protection System Assemblies for Pipelines, Mineroducts, Aqueducts, Gas Pipelines, Water Storage Tanks or Hydrocarbons, Marine Platforms, Docks, Barges.
- Anodic Protection System Assemblies for Sulfuric Acid Storage Tanks.
- Installation and supply of Monitoring Units for Cathodic Protection.

Materials Supply

CPI Co. delivers all materials under International Quality Standards and Factory Certificates and according to the specified geometries and weights.

- Sacrificial Anodes.
- Impressed Current Anodes.
- Backfill.
- Reference electrodes.
- Solid state polarization cells for protection against electric shock.
- Siding and Rehabilitation Materials.
- Connection boxes and test stations.
- Cables.
- Insulation Kits.
- Equipment and accessories for internal corrosion monitoring.

Equipment Supplies

- CIS Inspection Equipment, PAP (ON-OFF) with GPS.
- AC / DC current switches synchronized via GPS.
- Continuous multi-channel data logger.
- Equipment for Inspection of insulation joints in flanges by Radiofrequency.
- Cable and Pipe Locators.
- Single-phase or three-phase grinding units by air or oil cooling and with NEMA 3R or NEMA 4X enclosures.
- Remote Monitoring Units for Cathodic Protection Systems via radio, cellular or satellite signal.
- Resistivity meters.
- Radio Frequency Isolation Meters.

Consulting, Auditing and Interventory

CPI Co. has a team of professionals and technicians with an ample level and trajectory in many countries of Latin America to provide confidence to our clients in the correct operation of the proposed objectives.
